

# AMIEL JOSH GARCIA BASUG

## COMPUTER ENGINEERING INTERN

**Phone:** 09628247241

**Email:** amieljosh05@gmail.com

**Address:** Paralum, Lal-lo, Cagayan

**LinkedIn:** [linkedin.com/in/amieljoshbasug](https://www.linkedin.com/in/amieljoshbasug)

**Github:** <https://github.com/juswa005>

**Portfolio:** <https://amiels-portfolio.vercel.app>

## PROFESSIONAL SUMMARY

Computer Engineering student with a strong foundation in programming, hardware, networking, and problem-solving. Eager to learn new technologies and apply technical skills in collaborative and professional environments.

## SKILLS

**Programming:** C, C++, C#, Python, HTML, CSS, XAML, Bash Scripting

**Embedded & Hardware:** Arduino, ESP32, Raspberry PI, sensors, circuit design

**Tools & Systems:** Linux (Arch, Ubuntu), Git/GitHub, Networking, Databases, Wayland (Hyprland)

## PROJECTS

**Arduino MAX7219 6-Digit Timer** - [C++, Arduino Uno, MAX7219]

- Designed a modular count-up/count-down timer using multiplexed 7-segment displays
- Integrated debouncing logic, buzzer alerts, and optional LCD display support

**Sentry – RFID Attendance System** - [C#, C++, Arduino Uno, RFID]

- Built a desktop + hardware-integrated attendance system with real-time RFID logging
- Implemented serial communication for automated Time-In/Time-Out tracking between Arduino and C# application

**Home Server Stack** - [Ubuntu, Linux Networking]

- Developed a self-hosted home server environment for local cloud services and system automation
- Configured networking, service deployment, and system monitoring for personal infrastructure use

**Orbital WiFi (Wireless Network Utility Tool)** - [C, C++, Linux Networking]

- Developed a wireless network utility for scanning and analyzing nearby WiFi environments
- Implemented low-level network interaction logic for signal detection and monitoring

**Orbital Speedtest (Network Performance Analyzer)** - [Python, Bash, Networking Tools]

- Built a network speed testing tool to measure bandwidth, latency, and connection stability
- Automated repeated network performance tests for diagnostics and analysis

**C++ Archives (DSA Practice Repository)** - [C++]

- Implemented data structures and algorithms for problem-solving and coding practice

**Amiels Portfolio Website** - [HTML, CSS, JavaScript]

- Designed and deployed a responsive personal portfolio showcasing projects and technical skills

## EDUCATION

**University of Saint Louis Tuguegarao**

BS Computer Engineering

Aug 2023 – Present

- Relevant Coursework: Data Structures & Algorithms, Software Design, Electronics & Electrical Circuits, Computer Network Security, Artificial Intelligence / Machine Learning

**Lal-lo National High School**

STEM Graduate | High Honors

Sep 2021 - Jul 2023

## CERTIFICATES

Google Foundations of Cybersecurity - Coursera

Jun 2026

Google AI Professional - Coursera

Jun 2026

Google AI Fundamentals - Coursera

Apr 2026

Google AI Essentials - Coursera

Feb 2026

Introduction to Cybersecurity - CISCO Networking Academy

Feb 2026

Operating Systems Basics - CISCO Networking Academy

Nov 2025

Python Essentials 1 and 2 - CISCO Networking Academy

Nov 2025

Civil Service Commission Passer (Professional Level) - Civil Service Commission

Mar 2025

Computer Systems Servicing NC II - TESDA

Aug 2024
